Funded Research Pipeline

A practical route from faculty idea to funded impact

Operating principle: engage early, route cleanly, reduce surprises, and keep the project moving from concept to award.

Cayuse + ORSP
Start the Proposal Request Form early so routing, approvals, and sponsor submission stay on schedule.

1 — Idea

Define the research question and why now.

2 — Atom Grants

Identify aligned sponsors, opportunities, and eligibility.

3 — Grant Writing Enhancement Program

Develop aims, budget, team, and narrative.

4 — Submit

Route approvals and submit through Cayuse.

5 — Manage

Launch, steward, report, and scale outcomes.

Atom Grants

Personalized research profiles and funding discovery in one workspace

HOW IT WORKS

From profile to proposal

Atom converts a researcher's record into a tailored pipeline of funding opportunities.

1 **Build the profile**

Upload a CV or refine the AI Research Profile with Atom AI.

2 **Discover the fit**

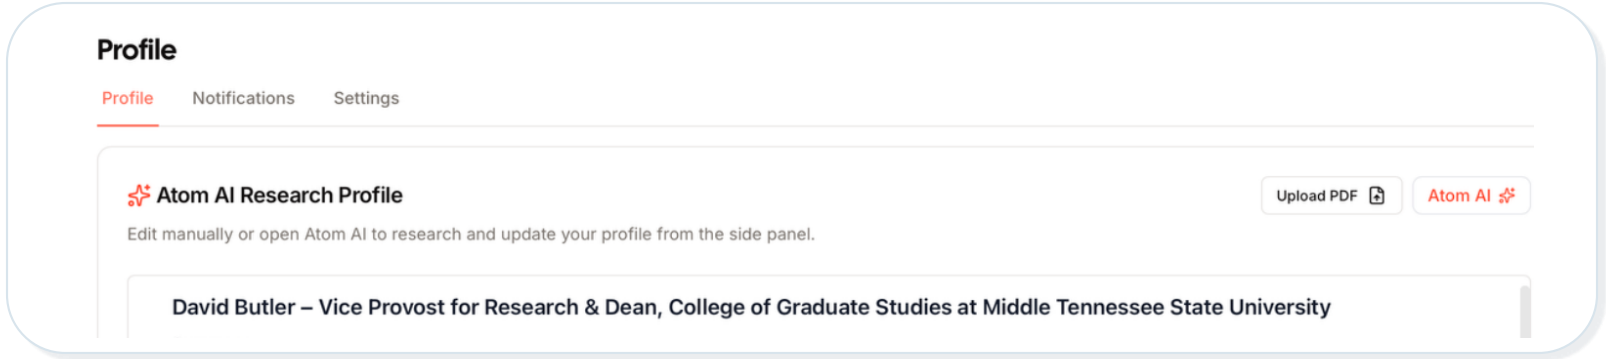

Review personalized grants, sponsors, deadlines, and award amounts.

3 **Move it forward**

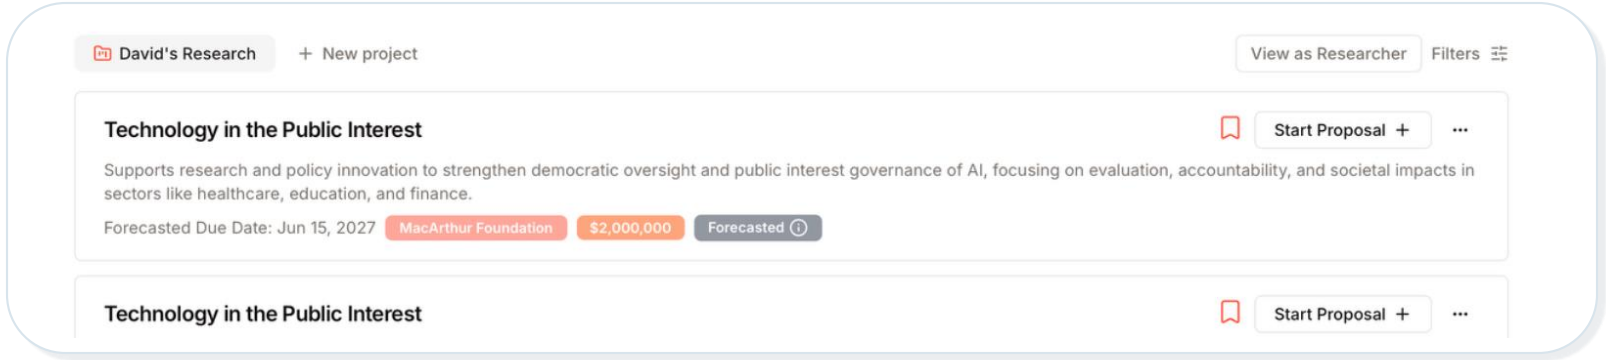

Favorite opportunities, organize projects, and start a proposal.

PROFILE → MATCH → START PROPOSAL

1 | AI RESEARCH PROFILE

2 | PERSONALIZED GRANT DASHBOARD

Grant Writing Enhancement Program

A structured curriculum for stronger proposals and funded leaders

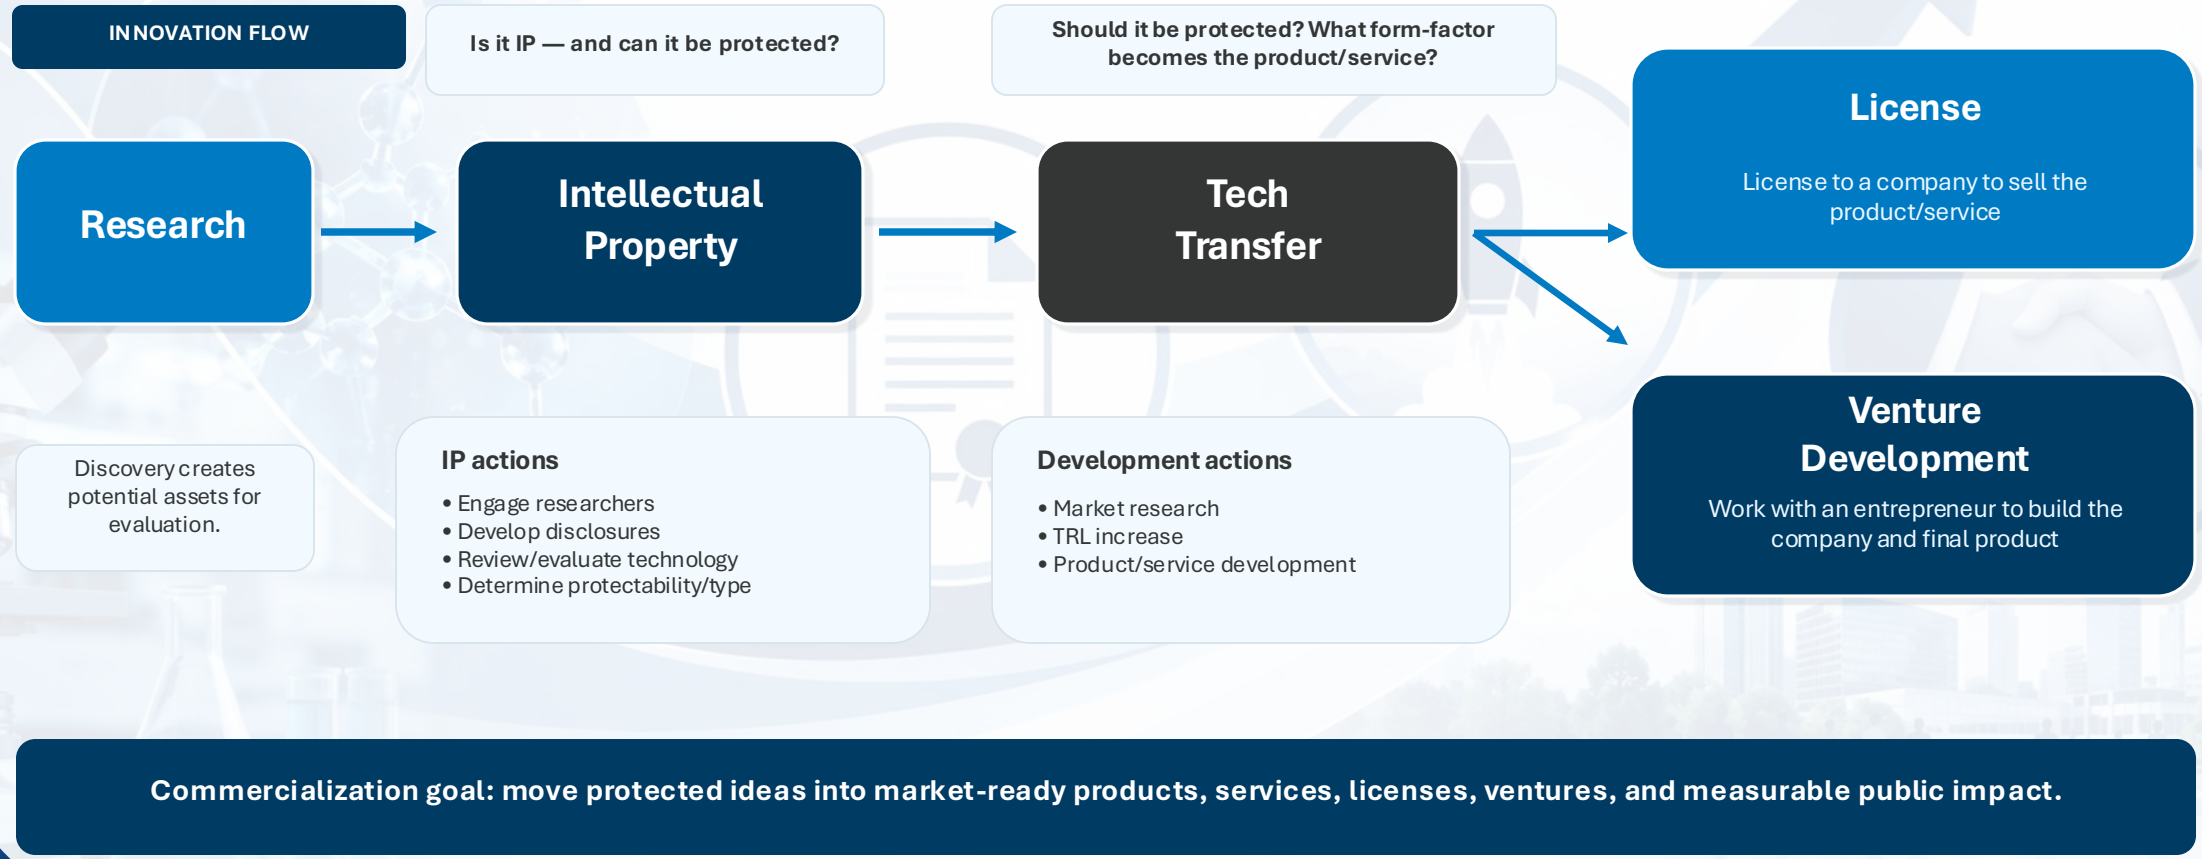

Year 1	**Foundations**	Opportunity fit, aims, narrative structure, and budget logic.
Year 2	**Development**	Peer review, revision discipline, and resubmission strategy.
Year 3	**Leadership**	Award management, centers, programs, and sustained funding.

Purpose: prepare scholars to be successfully funded leaders and strengthen sponsored-program engagement.

Commercialization

Flow of innovation from research to IP, tech transfer, licensing, and venture development

Commercialization goal: move protected ideas into market-ready products, services, licenses, ventures, and measurable public impact.
